

Project: FACULTY WEBSITE

Project Assigned by: Dr. Mumtaz Qabulio

INSTRUCTIONS

Project Overview

Design and develop a fully functional, database-driven dynamic faculty website in which database design, faculty website, signup form, and portfolio system are properly integrated and all modules operate smoothly.

1.Database Design

Begin with proper database design and create a complete ER diagram. Define tables such as Teachers, Departments, Facilities, and Programs with primary keys and foreign keys.

2.Faculty Website

Parent website must include following features

- Show, add, delete, update departments
- Show , add, delete, update Facilities (Computer Lab, Electronics Lab, Telecommunication La; Library: with complete books information.)
- Teachers Page: Display teacher picture, name, and portfolio link.
- Show Teacher profiles in portfolio format
- Registration: Systems must provide role based registration and login feature (role: Teacher, Student, HoD, Dean).

Each user should be able to update his/her profile.

Actions must be done according to user rights.
